AIR PURIFIER “OZ-AIR® ACTIVE”

With the rise of air pollution, the necessity of clean breathing air can no longer be ignored. As per WHO air inside our homes can be 2-5 times more polluted than outdoor air. **OZ-AIR® ACTIVE** Air purification system uses an advanced HEPA technology along with Anion & Photo catalytic Filter which can mostly capture dust, PM2.5, pollen, bacteria, allergens, TVOC.

SPECIFICATIONS

- **Air Flow** : 250 m³/hr
- **Clean Air Delivery Rate** : 180 m³/hr
- **Applicable Area** : 15 - 25 m²
- **Negative Ion** : $\leq 5 \times 10^6$ /cc
- **Power** : 220-230 VAC / 50 Hz / 1 \emptyset /53 W
- **Dimension** : 480 X 160 X 350 mm
- **Timer Function** : 1-2-4-8 Hr
- **Remote Control** : Yes
- **Control** : Child Lock / Remote
- **Indicator** : Filter Replacement, Room Temp.
- **Smell Sensor** : Yes
- **Filters** : Anion, Pre-Filter, Active Carbon Filter, HEPA
- **Noise Level** : ≤ 35 dB
- **Purification Efficiency** : 98%

OZ-AIR®ACTIVE Multi-layered Powerful 6 stage patented advanced multi-layered purification process eliminate respiratory airborne particles & dreaded airborne infections, making the air 99.9% pure & healthy

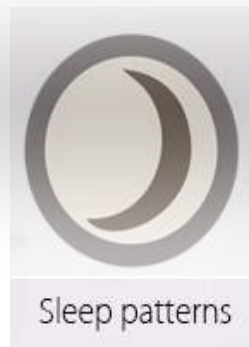

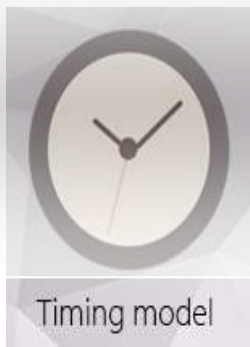

- Pre filter Filters out large particles such as dust, dirt and pet dander
- Honeycomb Active Carbon filter with large surface area to chemically bind and absorb more impurities like volatile organic compounds (TVOC) and other noxious gases.
- HEPA filter removes airborne pollutants down to 0.3 microns in size with an efficiency of 99.9%.
- Photo catalysis Combines with UV lamp to generate hydroxyl ions (OH⁻) which neutralizes and decompose toxic chemical. Like volatile organic compounds (TVOCs), and by killing bacteria and mildew. It's self-cleaning ability keeps the purification on, and is also safe and stable
- Anion generator Negative ions can actively kill bacterial and mildew in air and even in the furniture corners removes airborne pollutants from the air .They make the air inside your house clean and health.

Photo catalytic Filter with UV Generate Hydroxyl Ion Neutralizes & Decomposes Toxic Chemicals

PECI (Photoelectric Catalytic Device) Generate Negative Ion to remove Dust from the air.

OZ-AIR® ACTIVE

PED (Photo Electric Device) Which Effectively removes Microbes & Bacteria from the Air.

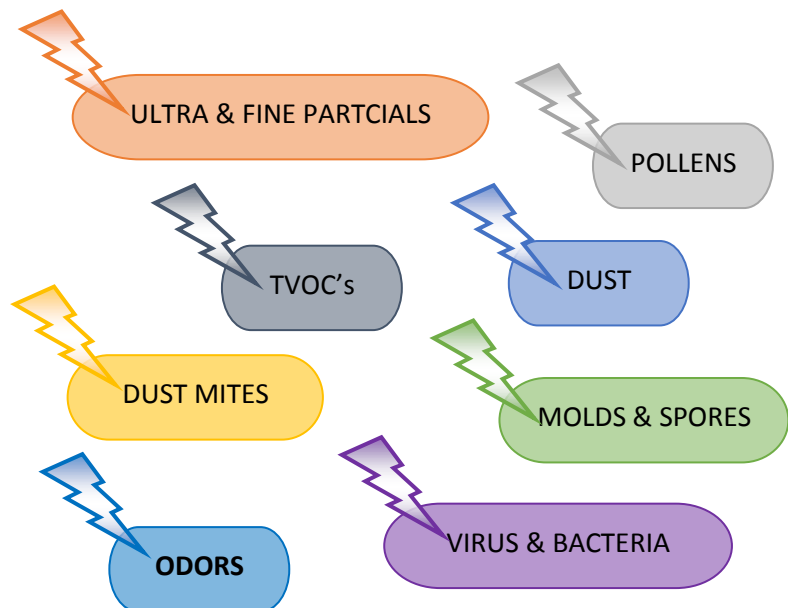

FEATURES

- Motor : Brushless DC Motor
- Smell Sensor : Testing air pollution status & translate to colours displaying
- Air Quality Indicator : Show in four colours (Excellent, Good, Moderate & Poor)
- Machine Control System : Remote Control, Touch
- AUTO Functions : Automatic working according to air quality status
- Sleep Patterns : Working in lowest speed level when user in sleeping
- Air Speed Level : Four level Air speed (Silence, Medium, High & Turbo)
- Timing Model : 1, 2, 4 & 8 Hr
- Anion : Start when machine start
- Filter changing indicator : Change used filter in time, avoid air pollution
- Child Lock : Avoid the trouble of mis-operation
- Temperature Display : Show room temperature in digital screen

OZ-AIR® ACTIVE IS EFFECTIVE AGAINST

APPLICATIONS

- Bedroom / Living Room
- Hotels/ Office Rooms
- Waiting Rooms
- Dining Halls / Banquets
- Hospitals / OPD / Nursing Homes
- Restaurants
