

AIR PURIFIER “OZ-AIR® ELECTRA”

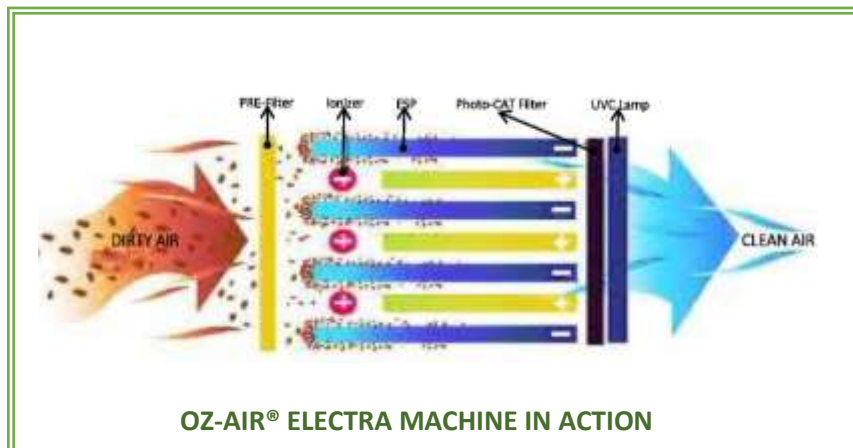

With the rise of air pollution, the necessity of clean breathing air can no longer be ignored. As per WHO air inside our homes can be 2-5 times more polluted than outdoor air. **OZ-AIR® ELECTRA** Air purification system uses an advanced Electrostatic Precipitation System that consumable free & washable, generate high voltage electrostatic field and much ion in negative which can mostly capture dust, PM2.5, pollen, bacteria, allergens, TVOC.

SPECIFICATIONS

- **Air Flow** : 250 m³/hr
- **Clean Air Delivery Rate** : 180 m³/hr
- **Applicable Area** : 25-30 m²
- **Negative Ion** : $\leq 5 \times 10^6$ /cc
- **Power** : 220-230 VAC / 50 Hz / 1 \emptyset /53 W
- **Dimension** : 480 X 160 X 350 mm
- **Timer Function** : 1-2-4-8 Hr
- **Remote Control** : Yes
- **Control** : Child Lock / Remote
- **Indicator** : Filter Replacement, Room Temp.
- **Smell Sensor** : Yes
- **Filters** : Anion, UV Lamp, Photo Catalytic, Electrostatic Precipitation, Pre-filter
- **Noise Level** : ≤ 35 dB
- **Purification Efficiency** : 98%

OZ-AIR® ELECTRA, with ESP, PED & PCF technology, automatically purifies and Senses your indoor air quality via GSS Sensor and a Status Bar Display. It Removes 99.97% of particles that pass through the 6 Stages of filters, effectively reducing allergens, gases and odors. It's ESP Technology Makes it practically consumable free & is ideal for a room with an applicable room size up to 25-30 m².

ESP (Electrostatic Precipitation Device) Traps Dust, Specs & Pollutants Within itself, Washable device avoid consumables

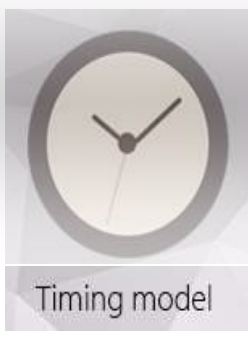

OZ-AIR® ELECTRA

PED (Photo Electric Device) Which Effectively Removes Microbes & Bacteria from the Air

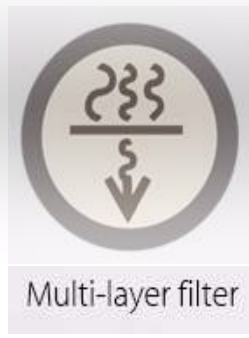

Photo catalytic Filter with UV Generate Hydroxyl Ion Neutralizes & Decomposes Toxins from the Air

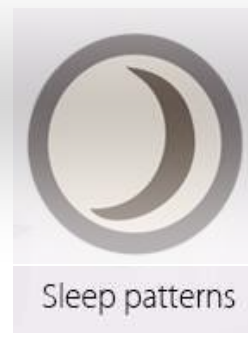

Child lock

Timing model

Multi-layer filter

Sleep patterns

FEATURES :

- Motor : Brushless DC Motor with Very Less Sound & Better Efficiency
- Design of System : Robust, User-friendly, Ease of Maintenance & convenient for use
- Smell Sensor : Senses Air pollutants Displays the Status by colours display
- Air Quality Indicator : 4 Level Intelligent AQMS Monitoring (Excellent, Good, Moderate & Poor)
- Machine Control System : Remote Control / Touch
- AUTO Functions : Automatic working according to Air Quality status
- Sleep Patterns : Working in lowest speed level when user in sleeping
- Automatic Control : Works on Auto Model Depending Upon Air Quality
- Air Speed Level : Four level Air speed (Silence, Medium, High & Turbo)
- Timing Model : 1, 2, 4 & 8 Hr
- Anion : Start when machine start
- Filter changing indicator : Helps to Check the Filter Replacement frequency
- Child Lock : Avoid the trouble of mis-operation or Misuse
- Temperature Display : Show Room temperature ON digital Display
- Particulate Matter : High-efficiency Removal Due to ESP Technology
- Photo-catalytic Filter : UV Generated PCF Filter removes Odours and other harmful gases

STATE OF THE ART ELECTRO-STATIC PRECIPITATOR UNIT

APPLICATIONS

- Bedroom / Living Room
- Hotels/ Office Rooms
- Waiting Rooms
- Dining Halls / Banquets
- Hospitals / OPD / Nursing Homes
- Restaurants

OZ-AIR® ELECTRA IS EFFECTIVE AGAINST
